Professional Summary

Cybersecurity-focused Software Engineer with hands-on experience in secure software development, threat detection, network security, and role-based access control through internships and real-world projects. Passionate about building resilient software that addresses real-world security challenges. Driven by continuous learning and committed to delivering secure, scalable, and impactful solutions.

Education

UPES | Dehradun, India

Aug 2023 – May 2027

B.Tech in Computer Science (GPA - 8.69)

Technical Skills

- **Languages:** Python, C
- **Web and Backend:** HTML, CSS, React.js, Node.js
- **Security:** Threat Detection, Network Security, Vulnerability Assessment, RBAC, Authentication & Authorization
- **Databases:** MySQL, MongoDB, SQLite, SQL Server
- **Tools:** Git, Docker, Github, Render
- **AI-Assisted Development:** Claude, Cursor, ChatGPT, Gemini, GitHub Copilot, Antigravity, OpenAI Codex

Experience

Dotnet Technology Intern | Duration - 8 weeks

Jun 2026 – Jul 2026

Havells India Ltd. | Noida, India

- Engineered a multi-role validation platform from requirements to deployment using ASP.NET Core MVC, C#, and SQL Server.
- Developed a multi-module portal that automated administrative workflows, reducing manual effort by approximately 25%.
- Designed validation and authorization workflows to improve process accuracy, consistency, and operational efficiency.

Blockchain Technology Intern | Duration - 12 weeks

Feb 2026 – April 2026

Sentienta Quality AI | Remote

- Developed a distributed multi-party validation platform enabling secure and tamper-resistant transaction workflows across 4+ user roles.
- Implemented automated anomaly detection mechanisms to identify behavioral patterns and suspicious activity, reducing manual monitoring effort by 30%.

Projects

Hades

- Engineered a multi-protocol honeypot framework emulating 5 network services with real-time event logging and behavioral analysis.
- Engineered a threat detection platform with REST APIs, automated risk scoring, and a live Blue-Team dashboard for monitoring attacks.
- Tech Stack: React, Ant Design, Three.js, Recharts, Axios, Python, Flask, Paramiko, dnslib, SQLite, Docker

Doctor Appointment System

- Developed a secure healthcare platform supporting JWT-based authentication, RBAC, and appointment management for 3 user roles.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT

Mail Phishing Analyzer

- Built an automated email analysis platform evaluating messages across 6+ indicators to identify suspicious patterns and assign risk scores.
- Tech Stack: Python, FastAPI, SQLAlchemy, SQLite, IMAP, Cryptography (Fernet), scikit-learn, HTML, CSS, Chart.js, REST APIs

Certifications

AWS Certified Solutions Architect – Associate
(SAA-C03)

Issued Sep 2026

- Credential ID: 4b3e8db203624f92b3bafa3f1d1f8126 | Verify Credentials

Research & Publications

Palm Vein Scanner

Jan 2026

- Proposed a machine learning based framework for CNN based palm scanning
- Accepted and published in *IMPACT proceedings*; available at digitalmanuscriptpedia.com/article

Machine Learning for Real-Time Threat Detection

May 2025

- Proposed a machine-learning framework for real-time threat detection using behavioral pattern analysis.
- Accepted and published in *SSCSDF-2025 Conference Proceedings*; available at zenodo.org/records/17556037
